

SC7370E™* brand

140,000/UNIT

MATURITY: 3.7

KEY FEATURES:

- Phytophthora Gene 1A

Agronomics	
Field Emergence	7
Plant Height	5
Canopy Width	6
Harvest Standability	7
Shattering Resistance	
Growth Habit	IND

Disease	
PRR Gene Resistance	-
Phytophthora Field Tolerance	
Brown Stem Rot	
Charcoal Rot	
Downey Mildew	
Frogeye Leafspot	1
Stem Canker Gene	
Sudden Death Syndrome	4
White Mold	

Insects	
SCN Resistance	
Aphid Antibiosis	
Plant	
Flower Color	W
Pubescence Color	G
Hila Color	BF
Pod Color	TN

Herbicide tolerances: 2,4-D choline in Enlist™ herbicides, glyphosate and glufosinate.

Enlist One® and Enlist Duo® are the 2,4-D herbicides for use with Enlist E3™ beans:

- Use Enlist One® or Enlist Duo® herbicide for excellent weed control
- Enlist One® and Enlist Duo® herbicide are labeled for use with Enlist E3™ soybeans
- Enlist One® and Enlist Duo® herbicide are the only 2,4-D herbicides labeled for use with Enlist E3™ soybeans
- Can apply Enlist One® or Enlist Duo® herbicide from burndown through R2 stage
- No plant-back restrictions following burndown with Enlist™ herbicides
- Control broadleaf weeds with 2,4-D choline in Enlist One® and Enlist Duo® herbicide

SOIL TYPE:

Ratings -

Characteristics are rated 1 to 9 with 9 being the best.

Aphid Antibiosis -

predicted feeding and colony establishment tolerance levels AA: above average · A: average · BA: below average Scouting and spraying are still required; but predicted population growth may be slower at AA ratings.

IMPORTANT: Trait rating scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by SCI. Information and scores are assigned by SCI and are based on period-of-years testing through 2019 harvest and were the latest available at time of printing. Some scores may change after 2019 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions and a wide range of both climate and soil types and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.

Multi-year and multi-location information is a better predictor of future performance. Hybrid and variety responses are variable and subject to any number of environmental, disease and pest pressures. Refer to an authorized Seed Consultants representative for the latest and complete listing of traits and score for each product. All products are trademarks of their manufacturer.

BOLT Always follow stewardship practices in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions. Varieties with BOLT™ technology provide excellent plant-back flexibility for soybeans following application of SU (sulfonylurea) herbicides such as DuPont™ LeadOff® or DuPont™ Basis® Blend as a component of a burndown program or for double-crop soybeans following SU herbicides such as DuPont™ Finesse® applied to wheat the previous fall.

Gly Tol Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with the Glyphosate Tolerant trait (including those designated by the letter "R" in the product number) contain genes that confer tolerance to glyphosate herbicides. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer.

Varieties with the DuPont™ STS® gene (STS) are tolerant to certain SU (sulfonylurea) herbicides. This technology allows post-emergent applications of DuPont™ Synchrony® XP and DuPont™ Classic® herbicides without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.

^ DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend® technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend® technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend® technology. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend® technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba.

Roundup Ready 2 Xtend® is a registered trademark of Monsanto Technology LLC used under license.

Corteva is a member of Excellence Through Stewardship® (ETS).

Corteva products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the policies regarding stewardship of those products. Crops and materials containing biotech traits may only be exported to or used, processed, or sold in jurisdictions where all necessary regulatory approvals have been granted for those crops and materials. It is a violation of national and international laws to move materials containing biotech traits across borders into jurisdictions where their import is not permitted. Growers should discuss these issues with their purchaser or grain handler to confirm the purchaser or handler's position on products being purchased. For further information on the approval status of biotech traits, please visit www.biotradestatus.com. Excellence Through Stewardship® is a registered trademark of the Excellence Through Stewardship.

Enlist E3™ soybeans were jointly developed by Dow AgroSciences and MS Technologies.

Enlist Duo® and Enlist One™ herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo® and Enlist One™ are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.
